Education

BSC in Computer Science | 2026

Lethbridge University | Lethbridge / Alberta / Canada

BSA in New Media | 2026

Lethbridge University | Lethbridge / Alberta / Canada

Projects

School

Issue Tracker Website | October 2025 – December 2025

Led a team in developing an issue-tracking website. Built backend functionality in C++ and implemented endpoints that connected to a frontend built with HTML and JavaScript.

Soul Sync | March 2025 – April 2025

A 2D co-op platformer where players must collaborate to progress, with each character's weaknesses balanced by the other's strengths. Showcased at GCC 2025.

Slime Clicker | November 2024

A browser-based clicker game where players click slimes to earn currency and purchase upgrades.

OpenGL Town | October 2024 – December 2024

Led a team in creating a C++ and OpenGL program that generates a drivable 3D town environment.

City Sim | April 2025

A procedural cityscape built in Processing. Features interactive elements such as spawning and despawning cars and clouds, as well as toggling the time of day.

Under Us | February 2023 – April 2023

Led a team in creating a C++ text-based adventure game where players explore a submarine and surrounding underwater areas to uncover mysteries.

Personal

My Portfolio | October 2025 - Present

Portfolio to show of my work, developed with typescript and react
